

## Carbon Reduction Plan for HGVC Training Services trading as HGVC

### **Introduction:**

As part of its commitment to sustainability and reducing its carbon footprint, HGVC Training Services (HGVC) is implementing a Carbon Reduction Plan. This plan outlines our goals and strategies for reducing carbon emissions associated with our operations. HGVC recognizes the importance of addressing climate change and is committed to doing its part to mitigate its impact.

### **Baseline Emissions:**

To determine our baseline emissions, we have calculated our Scope 1, 2, and 3 emissions for the year 2022. Our Scope 1 emissions come from our own vehicles and equipment, Scope 2 emissions come from purchased electricity, and Scope 3 emissions come from our supply chain, waste disposal, and employee commuting.

### **Goals:**

HGVC has set a target to reduce its carbon emissions by 30% by 2030, using the 2022 baseline as a reference point.

To achieve this target, HGVC will undertake the following strategies:

### **Vehicle Efficiency:**

HGVC will improve the fuel efficiency of its vehicles by implementing regular maintenance and retrofitting vehicles with fuel-efficient technologies.

### **Alternative Fuels:**

HGVC will explore the use of alternative fuels, such as electric, hybrid, and biofuels, for its fleet.

### **Renewable Energy:**

HGVC will increase its use of renewable energy sources, such as solar and wind power, to power its facilities.

### **Waste Reduction:**

HGVC will reduce waste generated from its operations through recycling, composting, and reducing unnecessary packaging.

### **Employee Engagement:**

HGVC will engage employees in its sustainability efforts and encourage them to adopt sustainable practices, such as carpooling and using public transportation.

### **Supply Chain:**

HGVC will work with its suppliers to reduce the carbon footprint of its supply chain by sourcing materials and products from sustainable sources and reducing transportation emissions.

### **Monitoring and Reporting:**

HGVC will monitor its progress towards its carbon reduction target by regularly measuring its carbon footprint and reporting its emissions data using the GHG Protocol reporting standard. HGVC will report its emissions data annually and review its progress towards its carbon reduction goal on a regular basis.

### **Conclusion:**

HGVC is committed to reducing its carbon footprint and mitigating its impact on the environment. Through the implementation of this Carbon Reduction Plan, HGVC will take proactive steps towards achieving its carbon reduction target and creating a sustainable future for its business and the environment.
